(French)

Promote Sustainability

Build common industry positions

Create an information clearing-house for hemp production, processing, trade, and markets

Support standardized terminology, specifications, practices, test methods, guides, and classifications

Develop database on broader measures of hemp social, economic, and environmental sustainability - for soil/ water quality and reduced pesticide use

Coordinating policy and regulation priorities

Monitoring global production, trade, marketing, and usage policies

Facilitate Research and Knowledge Transfer

Sharing Information

Advocating for regulatory standardization

Support standardized terms of international trade, including Harmonized Codes and cannabinoid levels

Support the development of the HEMP Sector at global level

Develop database on hemp greenhouse gas and carbon removal and sequestration for climate change mitigation
